

ECOCHOICE
Exterior Timber Solutions

The logo for EcoChoice Exterior Timber Solutions features a stylized green leaf icon above the company name. The text "ECOCHOICE" is in a bold, green, sans-serif font, and "Exterior Timber Solutions" is in a smaller, black, sans-serif font below it.

Ecochoice are specialist suppliers of certified durable timbers.

The beauty of working with sustainable timbers is that they also create a market incentive for responsible practices at the forest level. That's why we are passionate in finding you certified timber solutions – they are durable in every sense of the word.

So if you are looking for a material that is truly renewable, strong yet light, natural and recyclable and that will last you for many years, even in direct ground and water contact, we can help you.

You can count on our quick service to locate and deliver sawn or machined timber components from the largest stocks of certified species available in the market.

EACH PROJECT IS UNIQUE

We work closely with specifiers, contractors and the timber trade to ensure each project achieves the highest scores in sustainability, durability and also satisfaction! Our focus is on your individual project's needs, from heavy-duty marine fenders and footbridges to delicate cladding and urban furniture components.

YOU GET THE BEST DEAL

We're truly independent and are constantly growing our network of reliable suppliers around the world. This means we'll find you the best deal available – wherever it may be. Of course if you want we can always advise on suitable and certified alternatives which can save you time and money.

WE SPEAK TIMBER LINGO

So you can enjoy as much as you want our free advice, samples and data sheets services. We have an incredibly wide range of durable timber species to fulfil your project and also offer CPDs on specification and use of sustainable hardwoods – so why not just give us a go?

THE LARGEST STOCK ON EARTH

Unlike other timber companies we don't hold any stock – so you won't be pushed into the most convenient stock match. By working this way, your project has unrestricted access to the largest stocks of certified durable timber in the world and we are able to offer great prices and impartial advice before we import and deliver the best solutions to you.

FOCUS ON PROJECT DELIVERY

Your timber is delivered directly to site, on time and cut to your specification. To achieve this, we meticulously coordinate a multitude of forest operations, timber exporters, shipping lines, port agents, sawmills, planing and drilling factories, pre-finishing, preservative and fire-treatment plants as well as several national and international haulage specialists.

TOGETHER WE'RE STRONGER

By linking your project's requirements with a wide range of FSC® products available, we provide source forests with a much healthier chance of success and profitable progress. This also reduces your project's risk by increasing availability and reducing price volatility.

"Buying timber, as long as from certified sustainable sources, actually helps to save endangered forests."
Mike Bekin, Brazilian MD of Ecochoice Ltd

For free advice (and samples) on how to incorporate certified durable timbers in your project please contact us on 0845 638 1340.

Full bundles

Iroko, Massaranduba, Oak and many other species available as rough sawn or planed timber, quickly delivered to your address.

External Furniture

Your own design, in any profile (including complex shapes), turned into reality in beautiful durable hardwoods such as Iroko, Oak or Opepe.

Agricultural & Equestrian

High-end hardwoods for all your fencing and equestrian needs

FSC Plato® Wood Spruce

Plato's unique two stage thermal process dramatically improves the performance of this abundant timber species in an environmentally responsible way.

No chemicals are involved throughout the process, where a careful combination of temperature and pressure significantly upgrades the stability and natural durability of Norway Spruce, while retaining important mechanical properties.

Your project receives a beautiful product that is head-ache free and also available in a very wide range of sections (from 18mm to 100 x 650mm), ready for quick delivery from nationwide stockists.

All of this makes Plato® Wood Norway Spruce the perfect choice for projects seeking excellent environmental performance over a long worry-free service life.

Projects in its wide range of applications include cladding, rain-screens, decking, fencing and even ground and fresh water landscaping.

Benefits of

- No maintenance or coating required - 1
- Stability and durability similar to hardwoods - 2
- Natural, free from chemicals and 100% recyclable - 3
- Larger sections and less brittle than thermo treated woods - 4

FSC Plato® Wood Fraké

All the benefits of thermo treatment – finally applied to a natural exotic timber.

Fraké is a high-quality abundant wood species from responsible managed FSC forests in West-Africa.

The exotic wood surface is knot-free and has a beautiful variable flame-like appearance accentuated by the Plato process.

Plato®wood Fraké has acquired a high durability for cladding applications – so no maintenance or coating is required. Regular coating systems can be used to prevent natural weathering processes, including staining and even fire-treating Plato®wood Fraké (to class 0 or Euroclass B).

A uniquely beautiful and responsible solution that will give you many years of enjoyment.

Plato® Technology

- 5 - Light, safe and easy to work with.
- 6 - Readily available in large sizes and quantities
- 7 - Woods sourced from certified sustainable forests
- 8 - Can be painted, stained and fire treated (class 0 or Euroclass B)

CLADDING

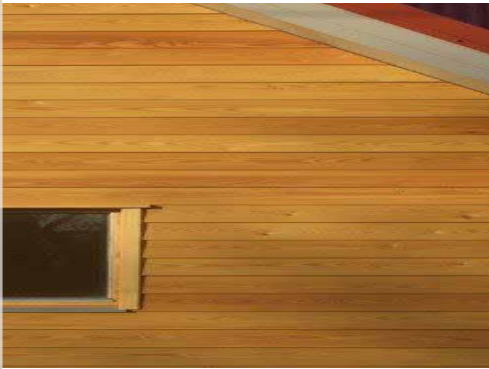

Western Red Cedar

Canada Wood UK

A favourite amongst architects and designers due to its recognised excellent natural performance.

Siberian & European Larch

A knotty and very cost effective option in durable timber cladding, available in standard or custom made profiles and sizes.

Hardwoods

Extreme natural durability and appeal with custom made sections in Oak, Cumaru, Ipe, Louro, and many other FSC species.

FOOTBRIDGES

Schmees & Luehn footbridges

Design, manufacturing and even installation of short or long-span footbridges, mixing timber with steel or concrete if necessary.

GLULAM

All the strength and freedom of design while meeting your project's sustainability goals. Arches, beams and pillars delivered to site according to your drawings, varnished, stained and fire-treated if required.

COASTAL & MARINE

Lock Gates

Oak, Ekki, Opepe, Greenheart and other suitable FSC marine timbers are cut, assembled, delivered and installed on site according to your requirements.

Piers & Pontoons

With Ecochoice you have access to huge stocks of durable timbers suitable for marine deck and pontoon construction.

Marine Fenders & Groynes

A renewable and certified sustainable solution to marine projects. Our range of hardwoods can be cut, chamfered and drilled to your specification.

Walkways

A renewable, elegant and durable solution to both public and private spaces. We can assist you with design, manufacturing and installation of timber walkways.

Retaining Walls

A sustainable alternative with proven performance and great public approval. Supplied either in ready-made panels, loose post and beams or as T&G vertical piles.

Sound barriers

Timber provides excellent sound deflection and absorption, while also meeting people's preference for a natural surface finish in both private and public environments.
